

Energy Economics, Inc.

Established in 1975, Energy Economics, Inc. has developed a reputation for delivering quality products and services for the utility and pipeline industry.

Dependable Service | Reliable Quality | Trusted Partner

Gas Measurement Products

Gas Meters

- New residential / C&I diaphragm & rotary meters
- Remanufactured diaphragm, rotary, & turbine meters
- Repair & parts for diaphragm rotary, & turbine meters

Regulators

- New residential / C&I regulators and parts

ERT | AMI | AMR Systems

- Index installation
- Index recovery and zeroing
- Module installation and programming
- Module recycling and recovery

Gas Meter Proving

- EEI SonicNine sonic nozzle prover
- Data integration / customization
- Bell strapping

Meter Management System (MMS)

- Meter shop management software
- Meter database test sampling
- Asset management
- Barcoding

Meter Shop | Measurement Services

- Commercial field testing (meters and regulators)
- Instrument testing
- Referee / third party testing
- Meter change out programs
- Meter sampling
- Off-site warehousing / inventory management

Corrosion Control

Anodes

- Custom manufactured anodes
- Magnesium (high-potential & H1)
- Galvanic and impressed current
- Drive-in
- Zinc
- Mixed metal oxide
- High silicone cast iron
- Graphite

Surveys

- Gas leak survey
- IR drop survey
- Test station survey
- Interrupted survey

CP Materials | Instruments | Test Equipment
